MANNERS D/FBIS

29 September 1986

Monday

1. INTERNET MEETING. The INTERNET meeting resulted in the following:
It is our intent to turn on the transponder between 15 January 87
and 1 March 87. If the Panama thing resolves itself by 15 November
86 (beginning of the sixty day turn on window for COMSAT), then we
will turn on both nodes in January. If on the other hand Panama is
not resolved and we are not pressured by INTELSAT to turn on, then
we will wait no later than 1 March 87 to turn on the system even if
it's only London. (cc: C/ESG, C/OPS) ☐
